- Recommended products based on customer needs
- Assisted customers in putting garden soil/earth in vehicle

ACADEMIC PROJECTS

FENT Games

(GitHub)   2024

Group project at College LaSalle

A website that features an online learning game designed for children. Built primarily using PHP for the game's code, SQL for managing a user's score history and uses CSS for the website's styling.

- In charge of creating the code logic for the questions of the game
- Helped in making the database for the users to save their scores
- Tested and debugged the website

SimuBet

(GitHub)

Group project at College LaSalle   2024

A simulated sports betting Android application that allows the user to bet on various sports. Built with Java and managed with a Firebase database.

- Helped in designing the application menus
- Implemented various APIs from various sports to display real-time information
- Tested application functionality and gave feedback on new additions from team members
